

# Evidenced-Based Approach to Instructional Excellence

## 7Cs Survey Results Gauge Teacher Effectiveness, Drive Improvements

The Tripod 7C survey instrument accurately measures and targets instructional improvements in your school and district. The instrument complements and improves the reliability of teacher observations and provides each teacher with a detailed, actionable pathway. Principals and professional development leaders can quickly gauge how to best support their entire staff.

### Evidence Based

Tripod's 7Cs framework for effective teaching captures essential elements of instructional practice. In fact, research published on the 7Cs demonstrates that it is a Tier 1 level, strong evidence-based resource - supported by one or more well-designed and well-implemented randomized control experimental studies - including the Measures of Effective Teachers study.

### Tied to Better Outcomes

Better results on the 7Cs components are correlated with higher student achievement, engagement and motivation, as well as happiness and college aspirations (Ferguson & Danielson, 2014; Ferguson et al., 2015; Kane & Cantrell, 2010; Kane et al., 2013; Stuit, Ferguson, & Phillips, 2013).

### Actionable at the Classroom Level

The 7Cs framework offers a streamlined way to provide actionable, consistent feedback for teachers and school leaders. The 7Cs supports reflection, goal-setting, professional learning, and instructional improvement.

### A Trusted Instrument

Prominent leaders – from the best private schools (including the top ranking Harvard Westlake), and major school systems (like Pittsburgh Public Schools and District of Columbia Public Schools) – all use the Tripod 7Cs to support instructional efficacy and drive excellence across their schools.

We firmly believe that student-voice has an important place in school improvement efforts. **Tripod's classroom-level instruments** already **drive professional growth and evaluation** in our district, and we look forward to adding school climate data to our toolkit as we work to establish and maintain environments in which all teachers can teach and all students can learn.

At Education Elements, we aim to set-up employee success from day one. In working with us, you leverage our expert facilitators and data scientists who know how to not only measure engagement and wellness, but also how to align your team to take the necessary steps to address the needs of the whole educator.

## The Education Elements' 7Cs Instructional Bundle

### Survey administration twice per year

- Strategize and support distribution, promotion, and communication
- Review and address technical needs, including rostering and translation
- Review of dynamic response rates

### Personalized Reports

- Dashboards for each school
- Reports for each classroom

### Making Meaning Workshops

- Create District wellness council / project governance
- Review survey data; align on themes and key insights
- Workshop to make meaning, take action, and build data habits
